

Cloud SSL Certificate Services

Security Beyond the Certificate

Why Cloud SSL?

- Trusted by more than 5,000 organizations in 85 countries
- Complete line of digital certificates
- Easy-to-use, easy-to-deploy
- A Best Practices Approach to SSL/TLS Deployment
- A Trusted Partner—real people you can depend on

In today's security-conscious world, your customers need to be confident that your web applications are secure for online transactions. Digital certificates serve as the foundation for verifying digital identities and securing transactions. Optimizing digital certificate use and management and maintaining security can be simplified with the right toolset.

Cloud SSL Certificate Services takes the guesswork out of certificate lifecycle management. Accessible from any web browser, our intuitive dashboard delivers critical insights in real-time and reports on actionable activity so that you can avoid security lapses and stay in compliance. Now with enhanced reporting, alerts and a fully configurable dashboard, it is even easier to deploy, audit and manage all of your digital certificates.

Because of our commitment to security and innovation, Cloud SSL Certificate Services is available as a value-add to all customers who purchase digital certificates from Trustify.

Security Beyond the Certificate

SSL/TLS certificates are core to implementing a true multi-layered, identity-based security environment.

The Cloud SSL Certificate Services centralized management platform takes the complexity out of SSL/TLS certificate management.

Cloud SSL Certificate Services exposes security weaknesses associated with SSL/TLS certificate installation and provides a robust set of tools to fix them. Our platform solves the most pressing issues impacting IT professionals by delivering 'Security Beyond the Certificate'—a certificate lifecycle platform built for Best Practices.

Cloud SSL Certificate Services is a key resource for organizations that want to:

- Certificate expiry notifications, reports on compliance proof and certificate populations and tools to receive alerts and automatically escalate problems as they arise

- Continually monitor discovered certs, web servers for secure configuration and vulnerabilities — and applications for threats

- Best practices for securely installing certificates, tools to auto-install certificates and recurring validation of proper certificate installation

- Find rogue certificates and identify certificate locations
- Import to central management console

- Flexible business models and customer friendly policies allow for recycling certificates and unlimited server licenses

- Intuitive request/approval workflows, customization options, and flexible pickup models

Deliver Peace of Mind

Cloud SSL Certificate Services Support Options:

- Silver Services are available 24x5 and are included with your digital certificate purchase
- Platinum Services includes one-to-one account support and 24x7x365 tech support and verification ability, automated SSL Server Test and Discovery. Platinum is available as an upgrade to Silver Services.

Cloud SSL is more than a security company. We're your partner — real people you can depend on to provide the security, focus and trust you deserve.

Our customers rely on us to protect their identity and online transactions. By delivering products that meet the highest security standards, we help you build trust with your customers and include the website monitoring that preserves your brand's reputation.

We deliver peace of mind with rock solid support.

1. Cloud SSL 's consultative approach builds value that carries through the lifetime of the certificate.
2. Our Best Practices approach provides you with the knowledge and tools you need to improve service uptime and avoid security lapses.
3. Our dedication to innovation, thought leadership and ongoing education makes you stand out at your job.

Cloud SSL stands behind its products, but more importantly, we stand behind you. That 's why we have a 98.5 percent renewal rate for SSL customers. Our reputation as one of the most trusted brands in online security means you can relax knowing your web application is secure.

“Recognized for Best Customer Service”

Here's Why Cloud SSL's Certificate Management System is Unique

This is why industry analysts, Frost and Sullivan, recognized Cloud SSL for best innovation². Our automated SSL Server Test is essential to checking for a secure server lifecycle, a critical component to managing certificates. We do our best to continually ensure that our customers have the very best customer experience while extending the highest level of security available.

Automatic SSL Server Test

Tests servers for secure SSL server configuration

Auto-installers

Reduce errors and save time – available for Windows IIS, Apache & Apache Variants

Policy & Best Practice Alerts

Notification when certificates violate policy and best practices

Certificate Recycling

Reuse SSL certificates for cost savings and inventory planning

Website Security bundles

Malware detection/remediation, reputation monitoring, Vulnerability/App scanning

Certificate Discovery

Find and track rogue certificates

Consolidated Management for Entrust & Non-Cloud SSL Certificates

One dashboard to locate, track and fully manage all digital certificates enterprise-wide

Bulletproof SSL eBook

Best Practices advice from an industry leading expert

Configurable Dashboard & Custom Reporting

The information you need when & where you need it

² Source Frost & Sullivan, "SSL/TLS Certificates Market - Finding the Business Model in an All Encrypt World"

94% of surveyed Cloud SSL Certificate Services customers agree the Subscription Plan is effective in saving money on digital certificates.

Source: TechValidate survey of 405 users of Cloud SSL

Fully Configurable, Centralized Platform

The Cloud SSL Certificate Services Platform is cloud-based and offers visibility, compliance and complete end-to-end certificate management through a unified dashboard for all digital certificate types.

Extensive Reporting

Custom charts, filtering and rules provide graphic-based reports to help organizations gain a comprehensive perspective on their certificate environment. Report customization, advanced filtering and automatic rules policy help streamline the day-to-day management of certificates.

Website Security

Basic and Enhanced Website Security Bundles powered by SiteLock are available to all Cloud SSL certificate owners. The program scans your website daily for known signature-based malware or links to sites with known malware, and their reputation monitoring checks leading SPAM lists and blacklists to ensure email domains and websites site are not associated with spam or malware. The Enhanced Security bundle offers additional remediation services including automated malware removal, Cross Site Scripting, SQL Injection, SSL, Application and network scans.

Flexible Licensing Options

Flexible licensing options give Cloud SSL customers the option to choose the most cost effective plan that works best for their budget and unique business needs.

SUBSCRIPTION Based Program

Reusable Licenses for Changing Web Environments

Our unique Subscription based plan gives customers the opportunity to reuse SSL/TLS certificates providing a cost effective way to plan and budget their SSL/TLS certificate inventory.

UNITS Based Program

Traditional Certificate License Provisioning

This is a unit based system for all digital certificate types where certificates can be issued for 1, 2 or 3 years, each year consuming one unit.

Customized Enrollment Options

eForms and API tools offer customizable enrollment options for distributed enterprise environments.

Fully configurable dashboard delivers the information you need when and where you need it.

Faster, More Secure Certificate Deployment

Automated capabilities simplify certificate installation, speed up deployment and reduce configuration errors.

ACME Services Auto-installer

The ACME Services for Cloud SSL automatic certificate installation protocol makes certificate installation on systems using Apache and Apache variants simple and easy. All you need to do is go to the web server, install and run the ACME-compatible CertBot, and ACME does the rest –there is no Cloud SSL client to install, and no need to create a CSR or install entire certificate chains.

Cloud SSL Turbo™ Auto-install Client

Eliminate manual processes and reduce errors commonly associated with SSL deployment with the Cloud SSL Turbo auto-install client. Cloud SSL Turbo provides a simple method to automatically install SSL/TLS certificates, configure servers on Microsoft Windows platforms, speed up deployment, and provides a hassle-free way to support Always-On SSL Best Practices by reducing installation and server configuration errors.

Awarded Best Innovation— Cloud SSL Automated SSL Server Test ³

Certificate Pickup Wizard

Cloud SSL Certificate Pickup Wizard is an intuitive process that makes installing Cloud SSL SSL/TLS certificates quicker by streamlining the certificate chain installation process.

Instant Issuance

Instant issuance is available for pre-approved domains and organizations for all digital certificates.

Best Practices

Cloud SSL offers ongoing training and thought leadership sessions to provide education, training and communication on practical techniques, trends and ways to mitigate security threats to help you maintain a secure server environment.

SSL Server Test

Testing your web servers for secure configuration protects your domain against threats, attacks and vulnerabilities. Cloud SSL 's SSL Server Test tests servers for secure configuration and reports back, performing a deep analysis of your web servers—identifying vulnerabilities, grading your level of compliance, and providing notifications when servers do not meet high standards. The SSL Server Test is updated regularly to mitigate new issues and can be scheduled to deliver ongoing reporting without hands-on monitoring.

Bulletproof SSL/ TLS

Cloud SSL customers receive a digital copy of the quintessential ebook, "Bulletproof SSL and TLS – Understanding and Deploying SSL/TLS and PKI to Secure Servers and Web Applications" delivered through the Certificate Services platform. This complete guide helps our customers avoid or solve issues related to SSL/TLS certificate installation and management.

Proven Browser Trust and Compatibility

Cloud SSL SSL/TLS certificates are more than 99 percent compatible and interoperable with and trusted by today's leading desktop browsers, mobile browsers and Java clients.

Speed and Trust

Cloud SSL 's certificate revocation check services (Online Certificate Status Protocol (OCSP) and Certificate Revocation List (CRL)) are integrated with Akamai, the world's top Content Delivery Network (CDN) which dramatically improves global website performance and stability. Website performance is directly impacted by the speed of the revocation checks, and the site's uptime is affected by the resiliency of a revocation service.

Flexible Policies

SSL/TLS certificates include unlimited server licensing and unlimited reissues.

³ Industry analysts, Frost & Sullivan, "SSL/TLS Certificates Market - Finding the Business Model in an All Encrypt World "

Cloud SSL Certificate Services Support Options:

Flexible Licensing Policies include:

- 30 day Refund
- 30 Day Re-issuance Guarantee
- Unlimited Reissues
- Unlimited Server Licenses
- Meets or exceeds all minimum requirements

SSL/TLS Certificates

Extended Validation (EV) Multi-domain SSL/TLS Certificate

Secures Two Domains with the Highest Trust Indicator Shoppers Look For

Advantage SSL/TLS Certificate

Powerful SSL/TLS Security for Two Domains

Standard SSL/TLS Certificate - Organization Validated (OV)

The trusted foundation for SSL/TLS security

Cloud SSL Wildcard SSL/TLS Certificates

Secure Unlimited Subdomains on One Certificate with Unlimited Certificate Duplication and Supports hybrid RSA/ECC deployment

Unified Communication (UC) Multi-domain SANs SSL/TLS Certificate

Secure Multiple Domains on One Certificate with Flexible Licensing Policies

Private SSL/TLS Certificates

Security for Non-registered Domain Names

Digital Certificates

Cloud SSL Document Signing Certificates

Validates Digital Signatures for Adobe® and Microsoft®

- Secures legally binding documents and supports the U.S. Federal ESIGN Act and many other international laws.

Cloud SSL Code Signing Certificates

Accelerate Trust with a Tamper-proof Seal for Software Downloads

- Supports digital signatures protecting your identity and delivering authenticity for your digitally downloaded software.

Cloud SSL Secure Email Certificates (S/Mime)

Publicly Trusted Secure Email Certificates

- Enables individuals or organizations to encrypt and digitally sign emails and other publicly trusted documents.

Cloud SSL Mobile Device Certificates

Certificate-based Security Without an On-premise PKI

- Seamlessly provision and manage device certificates directly to leading mobile platforms.

About Cloud SSL

Consumers, citizens and employees increasingly expect anywhere-anytime experiences — whether they are making purchases, crossing borders, accessing e-gov services or logging onto corporate networks. Cloud SSL offers the trusted identity and secure transaction technologies that make those experiences reliable and secure. Solutions range from the physical world of financial cards, passports and ID cards to the digital realm of authentication, certificates and secure communications. With more than 2,000 Cloud SSL colleagues around the world, and a network of strong global partners, the company serves customers in 150 countries worldwide.
